The results contained in this report pertain only to the tested sample.
This report shall not be reproduced, except in full, without written approval of Underwriters Laboratories.
This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the U.S. Government. The laboratory is not responsible for the information which provided by customer, its authenticity can affect the validity of the result in the test report.

Test List

Sample Received Date: 2024-10-22

Test Item	Sample ID	Model Number	Tests Conducted By
Integrating Sphere Test	7733859	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Hom Dong
Goniophotometer Test	7733859	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Hom Dong
THD and PF Test	7733859	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Hom Dong

Remark (if any)

1. UL test equipment information is recorded on Meter Use in UL's Aurora database.

Product Description

Luminaire Description: 1x4 Luminaires for Ambient Lighting of Interior Commercial Spaces
Model Number: BPANEL-50S54-UNV-D-8SC61-14-G-WH-P
Electrical Ratings and CCT: 120-277Vac, 50/60 Hz, 50W max, 3000K/3500K/4000K/5000K/5700K/6500K tunable
Driver Model Number: BQ-50L6-1250-40-M56
LED Package: BXVN-30E-13H-9NV, BXVN-65E-13H-9NV, Bridgelux Inc
Family Model and Variation: BPANEL-50S54-UNV-D-8SC61-14-XX-YY-P-ZZZ-***-##, where "XX" represent mounting, can be G=Grid mounting, SF=Surface mounting, SP=Suspended mounting, DF=Drywall flange mounting. "YY" represent Finish color, can be WH=White or others. "ZZZ" represent Emergency, can be EM*= Emergency types(* can be blank or any letter), blank=No emergency. "***" represent Sensor receptacle, can be SR#= Sensor receptacle types(# can be blank or any number), blank= Without sensor receptacle. ## represent junction box, can be JB=with junction box, blank=without junction box.

Photos of Products Characteristics

Integrating Sphere Test

Model No.	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Sample ID.	7733859
Operate time (Min.)	55	Stabilization time (Min.)	50

Test Method

1.The sample was tested according to the IES LM-79-2019, and the product is assume to be brand new without seasoning.
2.Photometric paramters were measured using an integrating sphere, a spectroradiometer and software. The ambient temperature condition inside the sphere was maintained at 25 °C ± 0.9 °C.The reference standard lamp is power 100W omni-directional Incandescent lamp and was calibrated by National Institute of Metrology, China.
3.The sample measurements were made using a spectroradiometer connected by a fiber optic cable and detector through the detector port of the integrating sphere. Coating reflectance of the integrating sphere was 90% to 98%. Photometric measurement conditions was using 4π geometry. The self-absorption factor is applied in the final test result. The sample was operated at rated voltage and was stabilized before measurement. Chromaticity coordinates, correlated color temperature and color rendering index were calculated from the spectral radiant flux measurements taken at 1 nm intervals over the range of 380 to 780 nm.

Integrating Sphere Test Conditions

Goniophotometer Test

Model No.	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Sample ID.	7733859
Operate time (Min.)	65	Stabilization time (Min.)	50

Test Method

1.The sample was tested according to the IES LM-79-2019, and the product is assume to be brand new without seasoning.
2.Photometric parameters were measured using a type C goniophotometer and software.
3.The ambient temperature shall be maintained at 25 °C ± 0.9 °C, measured at a point not more than 1.5 m from the sample and at the same height as the sample. The reference standard lamp is power 400W omni-directional Incandescent lamp and was calibrated by National Institute of Metrology, China.
4.The samples were operated at rated voltage and was stabilized before measurement. Luminous flux, luminaire efficacy, zonallumen were calculated from the software taken at 1° vertical intervals and 22.5° horizontal intervals. Photometric distance was more than five times of the largest dimension of the test SSL product.

Goniophotometer Test Conditions

Temperature (°C)	Voltage (Vac)	Frequency (Hz)	Current (A)	Power (W)	Power Factor	Orientation

THD and PF Test

Model No.	BPANEL-50S54-UNV-D-8SC61-14-G-WH-P	Sample ID.	7733859

Test Method

1. The samples were tested according to the ANSI C82.77-10-2014.
2. The ambient temperature condition was maintained at 25 °C ± 1 °C. The sample measurement was made using a digital power meter and power supply. The sample was operated at rated voltage and stabilized before measurement. The total harmonic distortion were calculated from the digital power meter.

Test Results

CCT Range	Voltage (Vac)	Frequency (Hz)	Current (A)	Power (W)	Power Factor	Current THD	Orientation
0%-3000K	120	60	0.412	49.1	0.9925	11.33%	Horizontal
	277	60	0.180	48.0	0.9622	9.88%	Horizontal
20%-3500K	120	60	0.410	48.9	0.9925	10.57%	Horizontal
	277	60	0.180	47.9	0.962	9.83%	Horizontal
